Professional Summary

I am a Full Stack Developer passionate about building clean, functional, and visually engaging digital experiences. While my core focus is software engineering, my background also spans UI/UX design, graphic design, and IT support. As a creative problem solver, I bridge the gap between robust backend architecture and user-centric design to deliver innovative solutions.

Tech Stack:

HTML, CSS, react.js, node.js, express.js, MongoDB, JavaScript, Bootstrap, PHP, MySQL, AJAX, jQuery, Git, M-PESA API, EmailJs and Cloudinary

Work Experience

ICT Intern | MOE Kitui West Sub-County **Oct 2025 - Oct 2026**

- Supported e-learning initiatives and assisted in the implementation of the Digital Literacy Program across schools.
- Trained and supported teachers in the use of digital devices and ICT integration in teaching, learning, and assessment.
- Provided first-line technical support, system maintenance, and promoted the safe and ethical use of technology in education.
- Assisted in the development of school ICT policies and innovations to enhance digital learning efficiency.

Software Developer | Zukbits Online - Kenya **Aug 2025 - Nov 2025**

- **Software Developer intern (Aug 2025 - Dec 2025):** Automated software builds, testing, and deployment to drive efficient release cycles. Collaborated with UI/UX personnel to integrate accessibility into software.
- **Software Developer (Jan 2026 - Oct 2026):** Developed security protocols to protect sensitive information from unauthorized access. Collaborated with team members to design, code, and test new features.

Remote Business Development Representative Intern | Fihankra Comtech LLC - Ghana **March 2025 - April 2025**

- Identified client objectives to present product and service solutions.
- Employed strategies to resolve client issues, retain clients and achieve sales goals.

Projects

1. **Witty MoodTracker |React.js, Express.js, Node.js, JWT, MongoDB | 2025**

- Developed a mood management portal for daily records. Users can add notes to capture what influences their mood and explore analytics to discover patterns.

2. **Witty HandUp System | React.js, Express.js, Node.js, JWT, MongoDB | 2025 – 2026**

- Developed a community-driven task management platform where users can post, claim, and track tasks.
- Integrated contact forms with EmailJS for instant, serverless email notifications.

3. **Witty Voting System | HTML, CSS, PHP, JavaScript, Bootstrap, | 2025 – 2026**

- Built a secure digital voting platform with voter authentication, media storage (via cloudinary) reducing ballot processing time by 80%.

4. **WittyMart E-Commerce system | HTML, CSS, PHP, JavaScript, Bootstrap, | 2026**

- Built a full-stack e-commerce solution featuring dynamic product catalogs, a secure shopping cart, Media storage (via Cloudinary), Automated emails (via Emailjs) and an order management dashboard to handle transactions seamlessly.

Education

Bachelor of Science in Information Technology

Kibabii University – Bungoma, Kenya

Graduated: November 2024

Skills

Technical & Design Skills:

- **Web Development:** Full-stack application development, responsive design, and API integration.
- **UI/UX & Graphic Design:** Interface design, prototyping, and visual asset creation (Canva).
- **IT Support:** Hardware configuration, software troubleshooting, and system maintenance.
- **Project Management:** Task prioritization, version control (Git/GitHub), and deployment automation.

Soft Skills:

- Problem-solving, effective communication, teamwork, self-motivation, and adaptability.
